

TARGET GROUP

This Skill Set is for experienced people employed in the materials testing industries whereby they are required to go out on site and to collect and prepare samples, often according to a sampling plan.

UNITS

Introduction to soils mechanics (optional pre-requisite)

PMLSAMP302A – Receive and prepare samples for testing

PMLSAMP400B – Obtain representative samples in accordance with a sampling plan

PMLTEST403B – Assist with geotechnical site investigations

PATHWAY

These units provide credit towards a number of qualifications including the PML30104 Certificate III in Laboratory Skills and the PML40104 Certificate IV in Laboratory Techniques.

SUGGESTED FORM OF WORDS FOR STATEMENT OF ATTAINMENT

These competencies from the PML04 Laboratory Operations Training Package meet the industry requirements for a Site Investigator.
